Ali Sajadi

Full-Stack Web Developer (Freelance)
Shahr-e Kord, Chaharmahal and Bakhtiari Province, Iran

Summary

I entered the realm of programming back in 2009 when I was just a middle school student, starting with the QBasic language that had been taught us there. After some time, I tried pretty much every programming language that I found interesting, but my favorite ones became C-styled programming languages. The programming languages which I'm most experienced with are Node js (for full-stack web development), Java (for Android development using Android Studio), and C# (for game development using Unity game engine).

I also have some experience working with Adobe products such as Photoshop, Illustrator, and After Effects.

Experience

Self-employed

Freelance Web Developer

July 2020 - Present (2 years 8 months)
